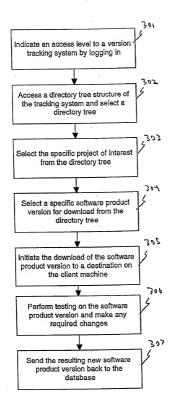

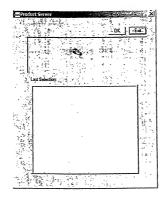

FIG. 3

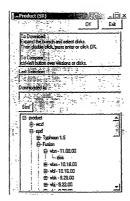

Product Server Component

The product Server component resides in the server, where the versions data base is located. This component creates a tree file structure inside a file containing the actual path of the physical files

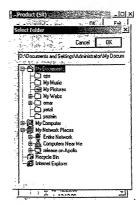

F: 4

The client component resides in the client machine and by a virtual link maintains a connection to the version database.

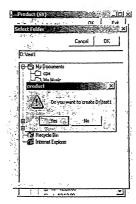

F15 5

The user double clicks in the desired item to be downloaded. Then the user is prompted for the location target to download the image.

1,56

If the target location directory does not exist, the user is prompted to accept or deny the creation of such directory.

While the process of downloading is in progress the user, can see the action by means of a copy animation box
